

## TASK 27 - DRUM ROLL

**Drum Roll** is designed for the student who may not have the necessary motor control to place a bead into a small opening. The wide funnel allows for the bead to be dropped into a large area where it will eventually roll into the opening. Encouraging independent action, the successful completion of the task is its own motivator.

For students who need that extra motivation, the roll of the beads in the funnel prior to their disappearance in the opening can be quite captivating. Like potato chips, it's hard to stop after the first one.

**ASSEMBLY:** Place the funnel in the opening nearest the center of the Shoebox lid. Check from the underside to ensure that the lid is level. Attach three Velcro strips equidistant from the base of the funnel to the underside of the lid, securing it in place. Extra Velcro is provided if needed.

### CONTENTS:

- (1) Shoebox base
- (1) Shoebox lid
- (1) 20 oz. container
- (1) funnel
- (10) 1 1/4" beads
- (6) 2" velcro strips
